MEGAETH

RedStone Warp

Why join us?

1. You'll build at the very forefront of **innovation**, shaping the future of oracles

2. You can step into **responsible roles** at an early stage of your career with us

3. You'll get a chance to work with **Tier 1** protocols & funds

- coinbase
- Lemniscap
- LATTICE
- arweave
- MAVEN11

And many more!

www.redstone.finance

I WANT YOU FOR REDSTONE EXPEDITION
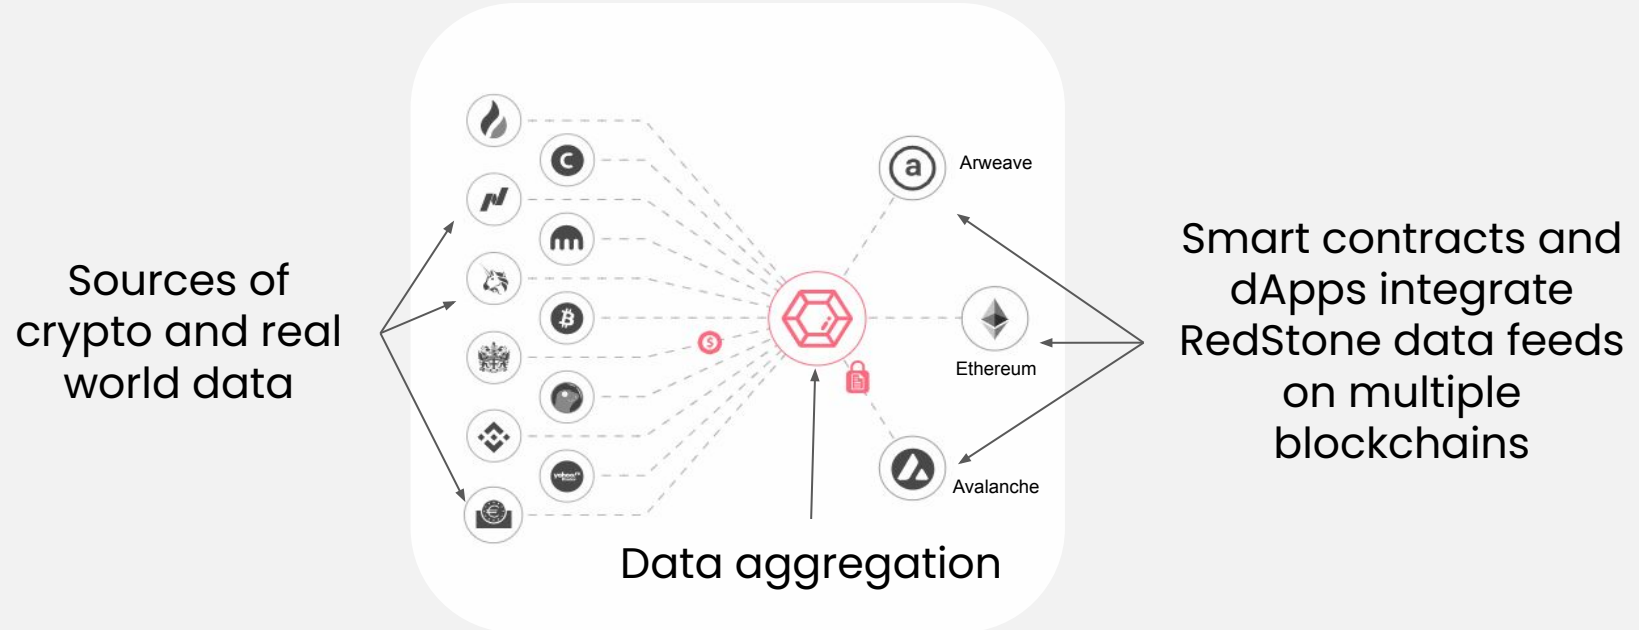

What's an Oracle?

The oracle acts as a middleware solution whose role is to connect the blockchain with the outside world by delivering data to smart contracts and decentralised Apps.

Sources of crypto and real world data

Data aggregation

Smart contracts and dApps integrate RedStone data feeds on multiple blockchains

Arweave

Ethereum

Avalanche

Why do you need an Oracle?

Oracles delivers data to dApps for smart contracts execution....

Currently it's mainly market data (volume, interest rate, market cap)...

Actually, over 95% are price feeds of assets (mainly crypto).

Q: What is the most utilized price feed?

◇ RedStone

RedStone: The fastest growing oracle

150+ clients, supports 100+ chains and secures $8bn

Lending markets	Leverage Protocols	Staking & Restaking	Yield Protocols
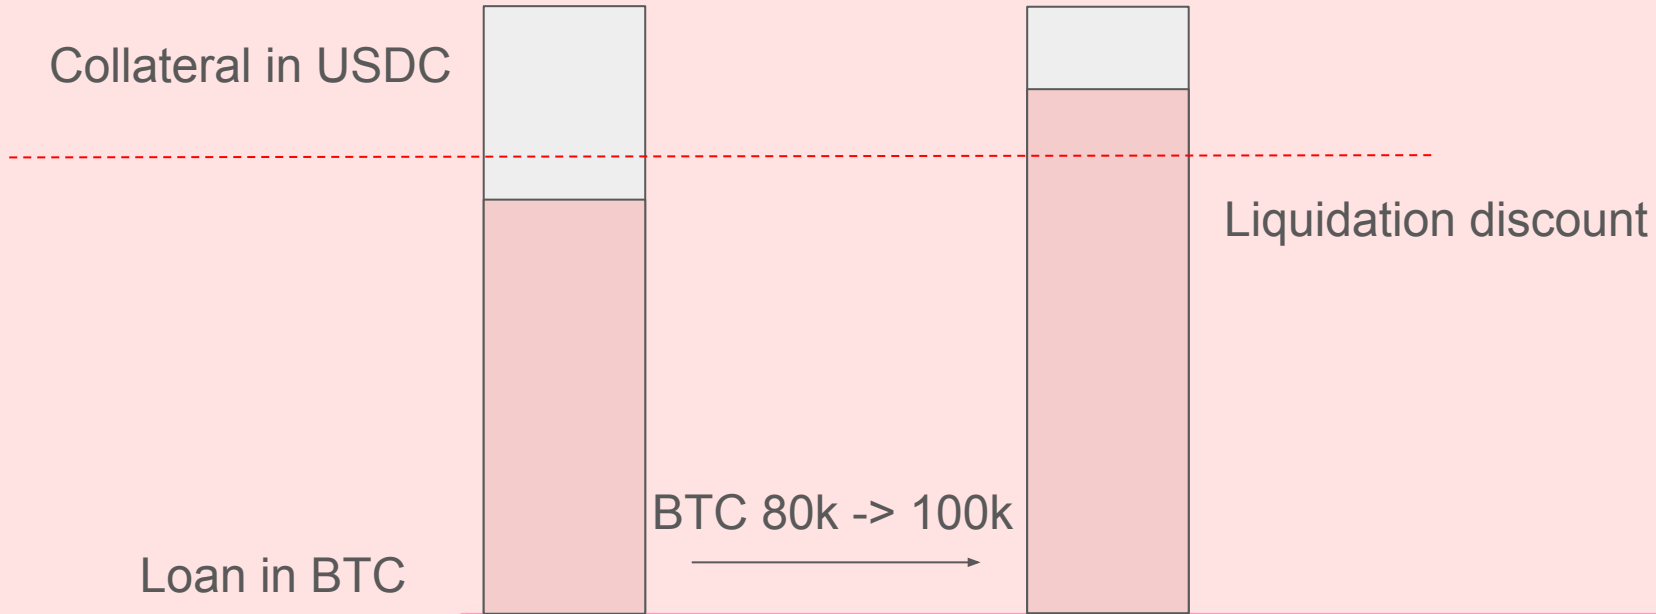

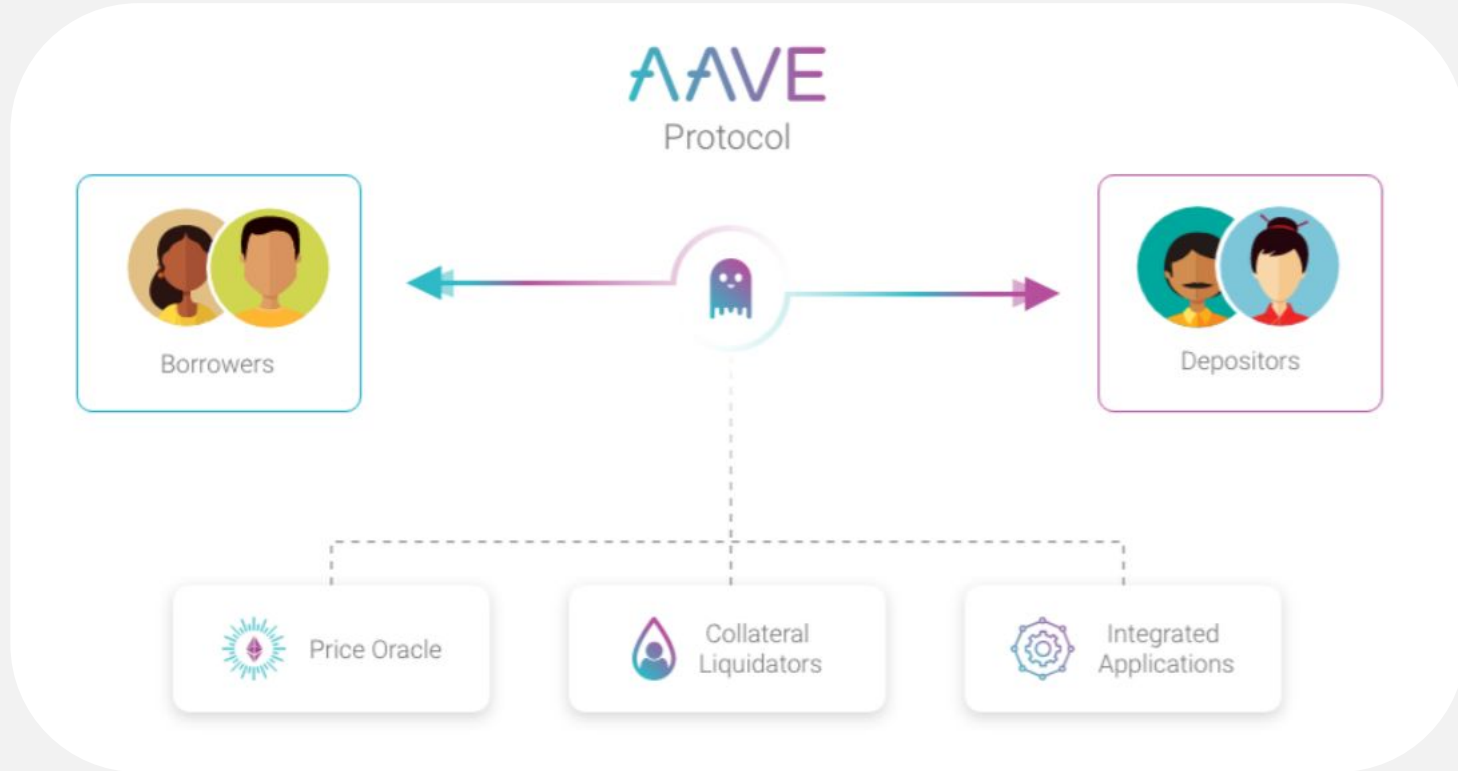

RedStone

Main 2025 oracles

	Chainlink	Pyth	RedStone
Oracle Models	Push	Pull	Push & Pull
Mispricing events*	**$11.2M lost in Terra crash** (article got down due to Chainlink's aggressive PR strategy, forum post) **25% mispricing** of Lido's wstETH **Proof of Reserve** failure	87% Bitcoin BTC mispricing Drift Protocol RBL mispricing Mango markets manipulation	✕
Blockchains supported	Push model = 18	Pull model = 70+	Push model = 38 Pull model = 70+
Non-EVM chains support	None Live Work in Progress	Solana, Aptos, Sui, Fuel, Injective and more	TON, Starknet, Fuel, Radix, Movement, Sui and more
Price Feed Sources	Aggregators	Publishers i.e. Market Makers	CEX, DEX, Custom Sources
Team Size	650	55	30
Oracle Extractable Value (OEV)	Smart Value Recapture (Ethereum-only)	Express Relay (cross-chain)	RedStone OEV (cross-chain)

I. Study DeFi

**Understand Key Mechanics of DeFi Well**

1. Seed phrase & wallet -> How to keep them safe and what wallets to use

2. How Ethereum works -> Smart Contracts, mempool, blocks, EVM

3. Layer 1 vs Layer 2 -> What a sequencer is, Optimistic vs ZK, RaaS

4. Stablecoins -> Read about Tether USDT vs Circle USDC

5. How DEXes work -> Slippage, Impermanent Loss, LP, Use Unisawp, Curve

I. Study DeFi

Understand Key Mechanics of DeFi Well

6. Lending -> Collateral & Liquidation dynamics, Use Aave & Morpho

7. CDP Stablecoin -> Play with MakerDAO & DAI and Liquity

8. What Staking is -> Slashing, Liquid Staking, Use Lido & RocketPool

9. Bridges & Oracles -> Use LayerZero, Axelar, Wormhole, study Chainlink, RedStone

10. Understand the difference between Market Capitalization vs Fully Diluted Valuation

II. Milliseconds matter
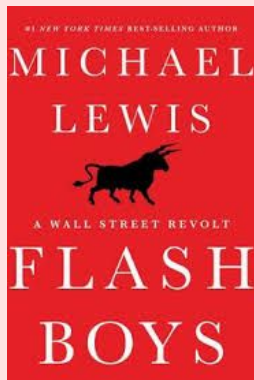

1300 km fibre optics cable ($300M)
from Chicago to New Jersey
to reduce latency from 17ms to 13ms
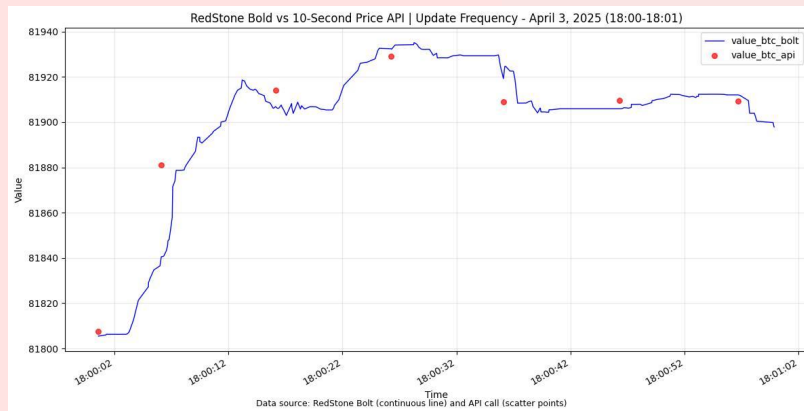

Eye can catch 60 frames per second

Senior Backend / System Engineer at RedStone (Node.js)

🏢 RedStone   📍 Warszawa, +4 Locations ⌄   🇺🇦

V. Poland rules 💪

- Each year number of tech and non-tech specialists from Poland climbs up
- Poles are hungry for success

"I Don't Know What Poland Does as a Culture and a System to Create Such Engineering and Research Talent."
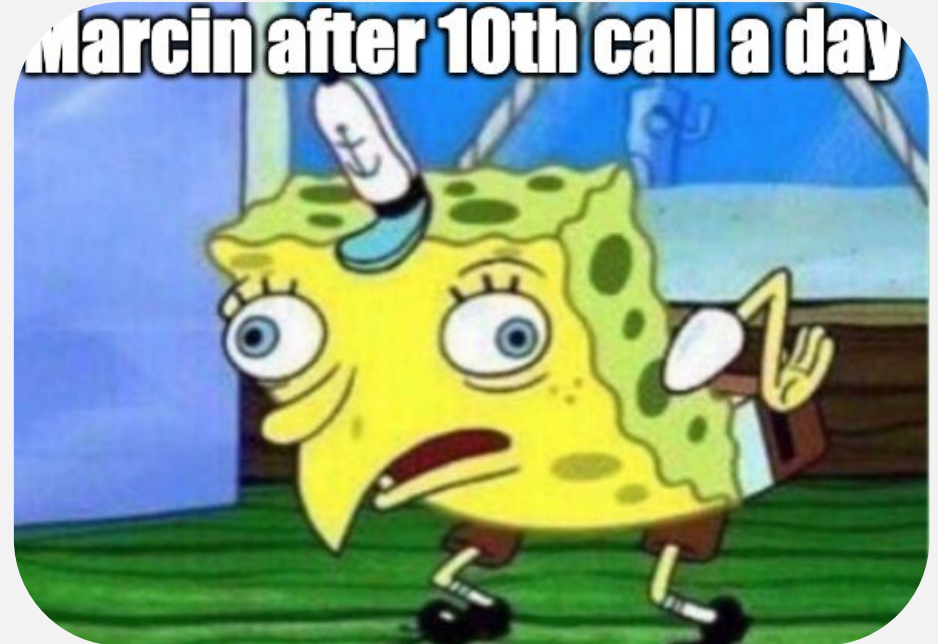

~ Sam Altman, OpenAI CEO & Worldcoin Co-Founder

Trend Is Your Friend

VI. Work Hard

Be Ready To Dedicate Yourself To The Company

# VI. Work Hard

VII. Manage Burn

90% of Startups Fail

Business Model = Revenue - Cost

- Don't burn cash like crazy before you find PMF or cash generation

- Conferences are good for testing interest

- Be creative to leverage your network and unfair advantages

The Tech Web3 Industry Globally Is Small And In Poland It's Still Micro

Key Trends

1. Tokenization & RWA -> ATH, Ethena USDtb & Securitize Converge

2. Stablecoins -> Chain Plasma & Codex, USD1, Visa & Bridge.xyz

3. Memecoins -> Majors vs casinos i.e. AxiomExchange (Y Combinator)

4. Kaito & InfoFi -> Pre-TGE arena + Overheard in Crypto Tg chat + Earn

5. Ether.fi Bank -> Potential challenger to Revolut

6. TradFi comes -> BlackRock BUIDL, Apollo ACRED, VanEck VBILL, J.P. Morgan Kinexys,

In Poland? RedStone with BNP & Aion & Zen.com?

We're Hiring! Job offers 👇

RedStone Token: RED
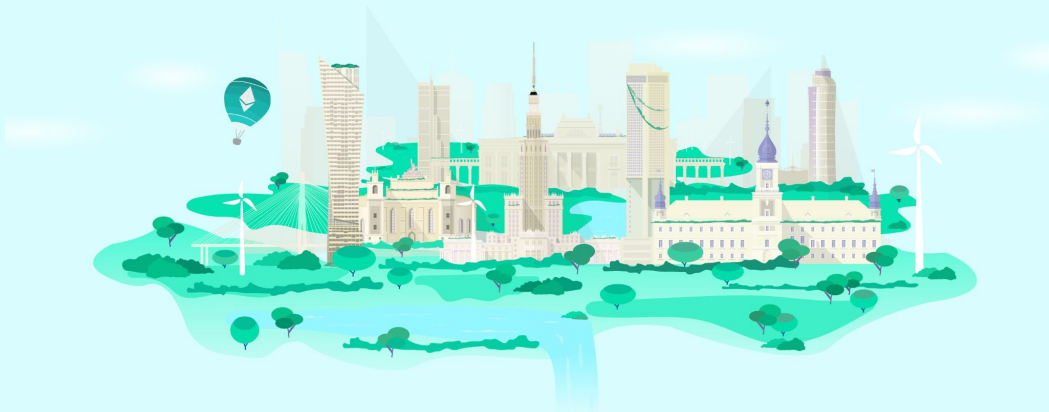

Staking to secure RedStone AVS and get RED & EIGEN rewards.

1. Security – EIGENLAYER
Node operators can be slashed if they
don't deliver high quality data

2. Community engagement
Seasons of RedStone expedition with
RedStone Gems (points) and roles on
Discord
